PROJECT : **PROPOSED GENERAL PEST CONTROL TREATMENT SERVICES**
LOCATION : **SSS Building, National Highway, Parian, Calamba City**
SUBJECT : **TERMS OF REFERENCE / SCOPE OF WORKS**

GENERAL:

- I The works under this project shall be subject to the requirements of the General Conditions which shall be included as part of these Specifications and which shall apply to all works to be performed.
- II Prospective bidders are required to conduct site inspection to determine all incidental materials and activities that are necessary to be furnished and executed to complete the project.
- III The works to be done consist of general household pest control treatment services with the use of highest grade/quality pest control solutions which shall be applied to SSS Calamba Branch Building.
- IV *Workmanship and work schedule*
 1. The work throughout shall be executed in the best and most thorough manner under the direction of and to the satisfaction of the SSS Branch Head or his Authorized Representative and shall have the authority to reject any works and materials, which in their judgment, are not in full accordance therewith.
 2. The contractor shall ensure the protection of existing structures from damage. Should damage be done, the contractor shall have full responsibility on the restoration or replacement of same.
 3. After application of pest control treatment and upon notice of SSS Calamba, the contractor is bound to remove, as soon as possible, all fallen/dead pests from the SSS premises to avoid foul smell that might be emitted.
 4. Works shall be done on a **monthly basis** and shall be completed within the year 2021 beginning from the date of receipt of Notice of Award and/or Job Order.
- V *Materials.* All chemicals/insecticides to be used should be duly approved by the Fertilizer and Pesticide Authority and FDA for public use under the supervision of a Certified Pesticide applicator. Only trained and experienced technicians shall carry out the service.
- VI *Payment.* Billing shall be submitted monthly after every treatment.

SCOPE OF WORK

1. **Fogging treatment** – manual spray or misting with insecticide of resigen EC and dichlorvos using spraying machine to eliminate, destroy and control transmitting social pests, mosquitoes, ants, roaches, housefly and other flying and crawling insects.
2. The fogging treatment and application of other chemical for the control/elimination of termites, ants, mosquitoes, flies, cockroaches and rats should be done monthly up to a period of one (1) year.
3. **Perimeter treatment / Termite Control**

Conduct of one massive treatment and provides monthly monitoring and maintenance of its effectivity.

Trenching around the building about one (1) foot depth on the unpaved portions and drenching with termite solution at the rate of 4-6 liters per linear meter with the use of motorized power sprayer.

Drill holes about 20 inches depth, 2 cm. In diameter, 2 to 3 ft. distance between holes on the paved portions around the building and beside wooden door jambs with the use of a portable electric drill and inject termite solution into each hole at the rate of 4-6 liters per hole.

Rat & Mice Control – treatment/application should compose of rat bait formulation or glue traps which contain a tenacious adhesive that traps the rodents as soon as it makes contact with the board containing the adhesive and racumin (warfarin - a rat and mice bait poison). The rat bait or glue traps shall be installed at strategic areas to control the infestation.
4. Eradication of termite mounds within the building premises.
5. The service provider should be anytime available to remove trapped rats to avoid unnecessary odor.
6. Conduct monthly inspection and submit report on the progress of pest control treatment.
7. All other works necessary for the completion of the project.
