

PROJECT: SUPPLY, DELIVERY & INSTALLATION OF CLOSED-CIRCUIT TELEVISION (CCTV) FOR VARIOUS SSS BRANCHES AND SERVICE OFFICES (SO)

QUERIES/CLARIFICATIONS RAISED DURING THE PRE-BID CONFERENCE AND WRITTEN QUERIES:

	Query/Clarifications	TWG/BAC Reply
1	For clarification will you accept another term for H.265+/H.264 to Ultra H4265?	The Ultra H4264 is acceptable. This supersedes the video compression technical specification requirement for all cameras. (Fisheye, Bullet and Dome Type cameras)
2	Are you going to provide us floor plan for each branches?	We have no floor plan for each branch. The stated requirement in the technical specification can be a guide for the bidder.
3	Is there a technical specification for system integration in terms of alarms and audio?	None
4	So, is it a straight forward installation only?	Yes, the requirement is installation and configuration.
5	In terms of delivery, what will be the requirement for this?	No particular pattern, it is up to the supplier on how they approach the delivery of the project.
6	Is the system acceptance will be simple checking whether the system is working and doing its playback & analytics?	We require a demo testing within the post-qualification evaluation. All indicated parameters in the technical specification will be checked for compliance. Failure to perform the demo and pass the testing during the post-qualification period will be a ground for disqualification
7	For the Single Largest Completed Contract (SLCC), is it multiple contract or joint venture or single entity?	SLCC shall be single contract of the bidder/single entity. Multiple contract is not acceptable
8	Will you provide us at least one floor plan for measurement purposes?	You can conduct site survey. We will provide sample floor plans, but it will be limited for some Branches/SOs.
9	For confirmation, analytics for alarm was not mentioned in the presentation but was stated in the Bid Documents, is it included ?	Yes, analytics for alarm is part of the requirements, please refer to page 32 and 33 of the Bid Documents.
10	DOM IP camera, is in video analytics. Is facial recognition a requirement?	Yes
11	Item 7, how about other cost like preventive maintenance with allocated housing cost	All incidental cost must included in the Bid price.

12	Pipes and conduiting? Do you have preference on it?	Pipes and conduiting shall be PVC. Cable running inside ceiling shall be PVC pipe.
13	For SLCC, is it aggregate?	No.
14	Are the installation and activation of the system are included to us	Installation, wiring and configuration of CCTV into operational state are included in the scope of works of the contractor.
15	If plans and location are available	There is no available plans. For reference purposes, please see attached sample plan of SSS Cubao Branch indicating proposed area/location vis-à-vis camera type.
16	In line with our pre-bid conference yesterday regarding the above-mentioned bid, I would like to ask when can we address our clarification below about the site survey needed prior to the bid submission	Any clarification/queries can be submitted to BAC prior to deadline for submission of query which was on June 20, 2022.
17	As per discussion yesterday, vendors can conduct a site survey in SSS' mini branch. May we know the specific site location, schedule and if there are any requirements for the said activity.	The bidder can conduct survey at any of the branches, preferably in NCR, refer to Annex "A" of the Bidding Documents. Site survey can be done during office hours (from 8:00 AM to 5:00 PM), Monday to Friday. Please coordinate with BAC/TWG on the proposed schedule for proper introduction to the branch to be visited.
18	On the technical specification of Bullet IP Camera, it includes analytic alarm for blacklist and whitelist license plate. Do we need our camera to have a feature for plate recognition? We are clarifying this because our understanding is that the camera will be just used inside the branch office of SSS and we think that having this feature is unnecessary. This feature is actually found in the technical specifications of the Network Video Recorder not in the Bullet IP Camera and we are thinking that it might just be a typographical error.	Yes, for the Bullet IP Camera, the technical specification requirement is blacklist and whitelist license plate only, the word "license plate recognition" is included in the '8 Channel Network Video Recorder (NVR) , see p. 34 of the Bidding Documents.
19	On the technical specification of Dome IP Camera, it includes analytics feature the work Facial Recognition . We would like to know	Face Detection and/or Face Recognition is acceptable. This supersedes the analytics requirement

	if in the data sheet of our offered camera, the wording describe in the feature is Facial Detection, will it be approved by the TWG as compliant to the required specifications?	in the technical specification for Dome IP Camera.
20	Single Largest Similar Contract (SLCC)	The Single Largest Similar Contract (SLCC) shall be: For Supply, Delivery and Installation of Closed-Circuit Television (CCTV)
